Planning ahead: Take advantage of current pricing

To support continued investment in our certification programs, learning products, platform enhancements, and customer experience, we will implement a price increase across our product portfolio effective January 1, 2027.

We are sharing this update early so you can plan budgets, purchasing decisions, and certification initiatives for the coming year. Orders placed by December 31, 2026, will receive current pricing.

Over the past year, we have continued to strengthen our offerings through new and updated certifications, expanded learning and practice test content, platform improvements, and ongoing investments in quality, security, reliability, and support.

We encourage you to review your anticipated certification and learning product needs for 2027. Your sales representative is available to discuss purchasing options, forecasted demand, and ways to maximize your investment before the pricing update takes effect.

Thank you for your support and continued commitment to helping learners build skills for academic, workforce, and career success.

Please note: This message is intended for U.S.-based CATCs. If you are located outside of the United States, please contact your local Solution Provider with any questions regarding pricing or product availability.

Meet the newest Microsoft Office Specialist certification

MOS: Excel for Operational Management Associate

The Microsoft Office Specialist certification program is expanding with Excel for Operational Management Associate, a new role-based certification focused on how Excel is used in operational work.

Candidates demonstrate how they apply Excel skills and operational knowledge to manage data, monitor processes, plan resources, and communicate insights. The certification is relevant across business operations, manufacturing, supply chain and logistics, resource planning, and process improvement.

Connect with your community

Teaching and using AI in the classroom

Adoption and use of artificial intelligence (AI) for learning purposes continues to grow, but many educators lack training on effective use of AI in the classroom. According to a survey from EdWeek, only 43% of educators surveyed had received any training on AI.

Join us on October 27 at 11 a.m. ET to demystify AI and discover simple, effective ways to integrate it into your classroom teaching.

Prepare your students for careers as engineers

Are you ready to find out how you can build bridges for your students, from classroom to industry?

In our latest CERTIFIED Educator Podcast episode, Steve O'Neil shares key skills your students need as engineers, plus projects you can use to help students build important capabilities. Discover tools your students need to master, and the impact of AI on engineering roles.

It doesn't matter what area of engineering you teach. Steve's advice will show you how to help your students bridge the gap between classroom and career.
