

**Digital Literacy** is the ability to learn, understand, apply and formulate ideas using information and communication technology safely and successfully. Mapped to the IC3 GS5 Global Standard, CCI Learning's world-class digital literacy courseware comes to life in Jasperactive.

## Jasperactive Digital Literacy

Provides success in modern society and prepares for Certiport's IC3 Certification by:

- Employing a variety of methodologies
- Using an exercise-based approach with real-world context
- Guiding the student with a performance level approach
- Allowing learners to assess their own understanding
- Generating quality data for learners and their instructors

## Global Solution for Digital Literacy

Jasperactive Digital Literacy is designed to:

- Deploy and scale quickly
- Tackle national and multinational issues
- Allow skills to be acquired anytime
- Have robust, secure and smart reporting

## Remote Learning!

Jasperactive is a conducive solution to all types of learning environments and schedules. It can be used on individual computers or in a lab setting. Resources on the learning pathway are easily accessible from a remote environment, allowing students to continue and excel in their studies from home.

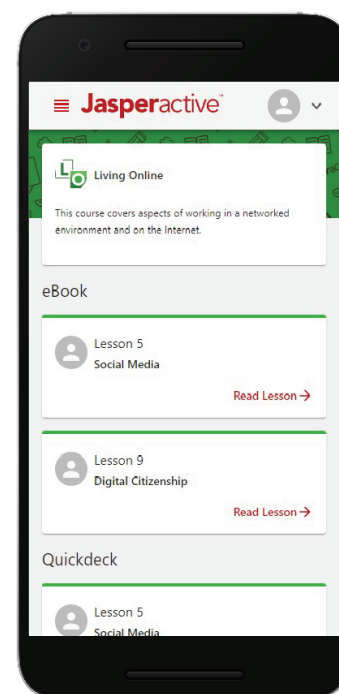

## Learner Features

 **Performance Levels Curriculum** – Level-structured courseware that helps guide a student from no knowledge to a certification-ready student.

 **Benchmark** – Formative assessment of skills used to reach each student at the performance level they are in and guide them.

 **Learning Library** – A rich collection of resources including QuickDecks, eBooks and QuickClips that assist all learning styles and attention spans.

 **Study Projects** – Scored exercises with a real-world context that set the stage for the exercises and guide the learner for a set of scenarios based on the context of the study project.

# Instructor Features

## Rapid Access

- Simple registration
- No installation required
- Web-based
- Scalable for cities and countries
- Multi-Level tier reporting by:
  - Learner
  - Class
  - Organization
  - Group

## Instructor Only Resources

- Reduce up to 85% of classroom preparation time with lesson notes and PowerPoint slides that:
  - Highlight key points
  - Reinforce basic concepts
  - Augment each lesson
  - Can be personalized for your learners

# Instructional Design Methodology

|             | Process   | Content  | Environment  |
|-------------|---|--|--|
| Learning    | <ul style="list-style-type: none"><li>• Level-based performance</li><li>• Deep-dive or accelerate</li><li>• Choose order of lessons</li></ul> | <ul style="list-style-type: none"><li>• Focus on a specific form: eBook, exercises, QuickDecks, and QuickClips</li><li>• Deep-dive or accelerate</li></ul> | <ul style="list-style-type: none"><li>• Mobile</li><li>• Web-based</li><li>• Available 24/7</li></ul>                          |
| Instruction | <ul style="list-style-type: none"><li>• Assign exercises</li><li>• Configure assets</li></ul>   | <ul style="list-style-type: none"><li>• Assign content</li><li>• Order of content</li></ul>  | <ul style="list-style-type: none"><li>• Customizable instructor involvement</li><li>• Scalable to a home environment</li></ul> |

# Study Project

The study project feature, provides a new exercise for learners to challenge. Learners will receive levels of assistance through the exercise to address teachable moments while capturing valuable information for instructors.

### Levels of Assist

**Hint** - Gives the learner access to the QuickDeck to get them to the right answer for the question.

**Here's the answer** - The learner is given the answer to the question so that they can move forward.

# Study Group Management and Gradebook

Instructors, Educators and Community decision-makers are empowered with key analytics that helps them manage their study groups, classes and institutions.
