INTRODUCING IC3 DIGITAL LITERACY CERTIFICATION GLOBAL STANDARD SIX

WHY DIGITAL LITERACY

Digital literacy is more important than it has ever been. Every job role, in nearly every industry, leverages technology to be more productive, more efficient, more reliable, and improve outcomes.

"You look at Marketing: Everything that's happening in marketing is digitized. Everything that's happening in Finance is digitized. So pretty much every industry, every function in every industry, has a huge element that's driven by information technology. It's no longer discrete." – Satya Nadella, CEO of Microsoft

A digitally literate foundation is essential to support success in both scholastic endeavors and employability demands. Ignoring digital literacy will limit opportunities, shudder possibilities, and hinder progress. IC3 Digital Literacy Certification validates a learner's knowledge, certifying that they have the know-how to use a computer and the essential applications while safely and securely navigating our modern digital world.

WHAT IS IC3 DIGITAL LITERACY

IC3 Digital Literacy Certification is a stackable credential that validates each learner's level of proficiency, whether beginner, intermediate, or advanced. It measures against seven major domains that are essential to success. It aligns to multiple international standards to ensure it is the most comprehensive solution available. The newest version, Global Standard Six, focuses on competency; allowing students to enter at the appropriate skill level and exit with mastery.
