

**The QuickBooks Certified User (QBCU) certification** is an industry-recognized credential that effectively validates one's skills in QuickBooks accounting software. Becoming an Intuit® QuickBooks Certified User signifies your students have the knowledge and skills to help manage the books effectively in the most prevalent bookkeeping application in small business today.

## Jasperactive QuickBooks

The perfect addition to any Accounting/Business program, this course covers all exam objectives for Certiport's QuickBooks Certified User certification by:

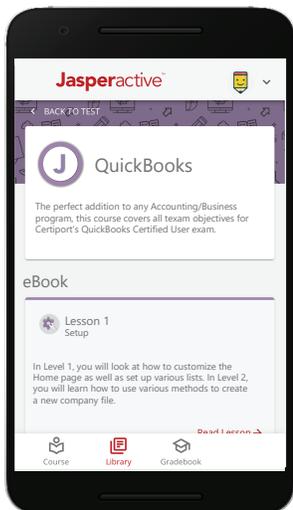

- Employing a variety of methodologies
- Using an exercise-based approach with real-world context
- Guiding the student with a performance level approach
- Allowing learners to assess their own understanding
- Generating quality data for learners and their instructors

While this course is specific to learning Intuit QuickBooks, and maps to the Certiport QuickBooks Certified User certification, much of the learning can be applied to other accounting software packages and general accounting programs. Once completed, you will be prepared to challenge the Certiport QuickBooks Certified User certification.

## Remote Learning!

Jasperactive is a conducive solution to all types of learning environments and schedules. It can be used on individual computers or in a lab setting. Resources on the learning pathway are easily accessible from a remote environment, allowing students to continue and excel in their studies from home.

## Learner Features

**Benchmark** – Formative assessment of skills used to reach each student at the performance level they are in and guide them.

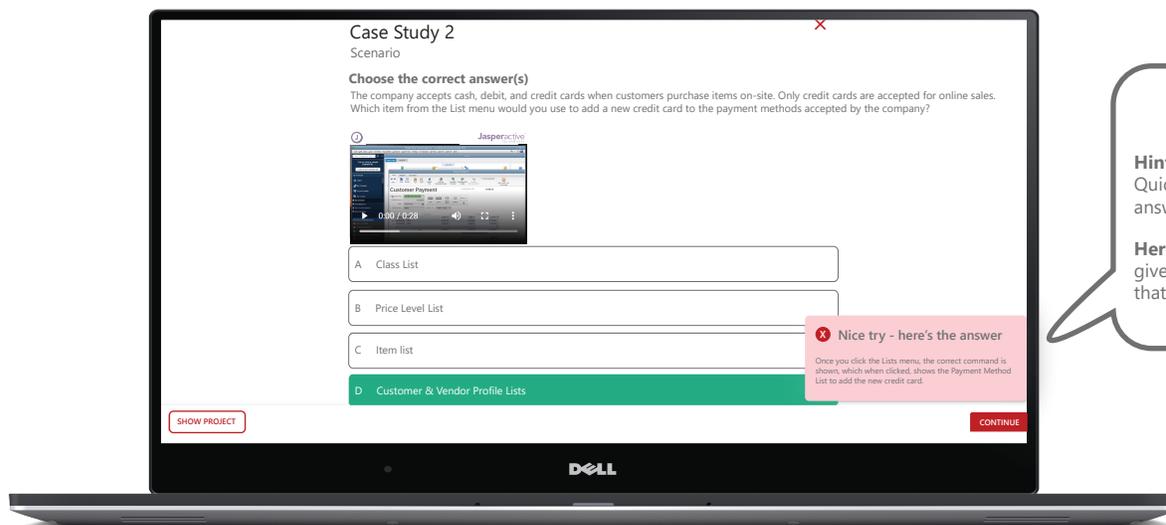

**Study Projects** – Scored exercises with a real-world context that set the stage and guide the learner for a set of scenarios based on the context of the study project.

**Learning Library** – A rich collection of resources including QuickDecks, eBooks and QuickClips that assist all learning styles and attention spans.

## Study Project

The study project feature provides a new exercise for learners to challenge while going through ten lessons. Learners will receive levels of assistance through the exercise to address teachable moments while capturing valuable information for instructors.

### Levels of Assist

**Hint** - Gives the learner access to the QuickDeck to get them to the right answer for the question.

**Here's the answer** - The learner is given the answer to the question so that they can move forward.

## Instructional Design Methodology

### Process

- Level-based performance
- Deep-dive or accelerate
- Choose order of lessons

### Content

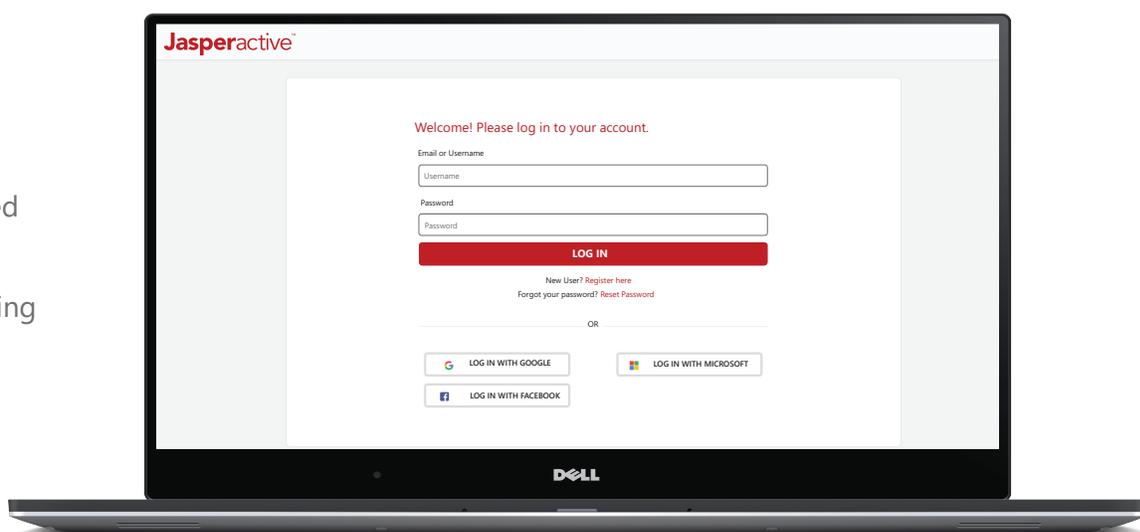

- Focus on a specific form: eBook, exercises, QuickDecks, and QuickClips
- Deep-dive or accelerate

### Environment

- Mobile
- Web-based
- Available 24/7
- Scalable to a home environment

## Instructor Features

- Simple registration
- No installation required
- Web-based
- Scalable
- Multi-Level tier reporting

## Study Group Management and Gradebook

Instructors, Educators and Community decision-makers are empowered with key analytics that helps them manage their study groups, classes and institutions.
