NEWS UPDATE

December 16, 2020

Improvements to English ACU Exams: Chromebook Support on EFH

We recently made a significant improvement to our English Autodesk Certified User exams. We added a task bar that allows candidates to switch back and forth between the Autodesk software and the exam in Compass. This update applies to both on-premise deliveries and scheduled

appointments through Exams from Home. With this change we now have support for candidates that are taking Autodesk Certified User exams in English through Exams from Home.

We have seen great success from this new feature in our Exams from Home deliveries, and for most of our on-premise deliveries. However, we are getting some reports about persistent problems with the task bar after the exam crashes, and even occasionally after the exam is completed successfully. For on-premise deliveries, we recommend that you attempt an exam at least the day before your testing session. If you see problems with the task bar, reach out to your territory manager who can help you to get an Exams from Home session booked.

To see a screenshot of what the task bar will look like and learn more about the update, see the FAQs for Support for CATCs using the button below.

Introducing the Unity Certified User: Artist Exam

Certiport and Unity Technologies are excited to announce the release of the new Unity Certified User (UCU) Artist certification.

This exam focuses on 2D and 3D digital artistry within Unity software to create interactivity in games, apps, AR/VR, and other experiences while measuring a candidate's ability to manage the basic aspects of dealing with art assets and familiarity with the Unity art pipeline. Successful completion will also demonstrate that students are competent in importing and working with 2D and 3D assets, placing and designing levels, and using tools within Unity to assist in experience creation.

Earning this level of certification while in school gives students confidence as they continue to master other interactive content creation skills and pursue additional certifications in the future.

The Artist exam is now available, with GMetrix practice tests and additional learning resources to follow.

Resources for You

The Value of Certification: Now More than Ever!

The year 2020 has been a year like no other. Many things have changed. As a result, there has never been a better time for students and workers to possess marketable skills. The best way to validate one's skills is through industry-recognized certifications. Certifications are an important credential that stand in addition to, in support of, or independently from degrees and diplomas.

Certifications are often created or supported by industry-recognized organizations and administered in controlled environments by authorized and independent agents. Because of this, they carry a high degree of credibility and possess great value.

To help communicate the message of value of certification, Certiport has assembled an excellent collection of resources, including white papers, datasheets, and videos. Please refer to these materials to learn more about the value of certification. To access these resources simply click below.
