

Succeed.

Start a Career in Technology.

Microsoft

Technology Associate

Microsoft® makes it easier for institutions to build and deliver technology education with a simple and affordable suite of entry-level technology certifications.

Enhance Your Technology Curriculum

- **Official credentials designed by Microsoft** — Stand out as an innovative educator by using exams created by industry experts on the most widely used and recognized technologies in the world such as Microsoft Windows®, Microsoft Visual Studio® and Microsoft SQL Server®.
- **Cost Effective** — Share a single MTA Campus License among all departments and programs within your campus. Administer MTA exams for a fraction of the cost of other technology certification exams.
- **Preparing for the future** — Help your students become more competitive. MTA is the first step towards more advanced certifications, which will help your students secure their value in the job market.

Help students explore their potential and passions while preparing them for information technology education and careers

- **Careers**—MTA certification differentiates students as prepared to start applying themselves in entry level technology jobs such as apprenticeships and internships.
- **Confidence**—Industry-recognized credentials inspire confidence as students pursue future college and career aspirations.
- **Completion**—Certified students complete their academic studies with statistically higher grades, lower dropout rates, and decreased school absences².

"I love the MTA program. I have been teaching Microsoft Certification classes to high school students for 14 years and the MTA program is the most relevant that I have ever seen. It prepares students not only for Industry, but for future Microsoft exams as well."

Allan
Teacher
Marshall Academy

"No matter what degree you chose or road you choose to travel, everything has become digital so you will need fundamental technology skills at every point in your life."

Deloris
Technology Specialist
College Connection

Opportunities to Thrive in a Technical Career

According to the 2013 IT Skills Demand and Pay Trends Report from the Foote Research Group, more and more companies are holding out for the IT professional who has the perfect skillset, and people with certifications who match those skillsets are getting paid a premium over what others in the same role without the certification are receiving.

"We wrote our curriculum using Microsoft certification standards to match what our students need to learn in today's global ICT sector. We tell them when they graduate, 'What makes you different from others with a diploma is that certification.'"

Keith Heathcote
